

What ever you feel

She wakes me up
Says drink this cup
You're gonna be strong

One Gypsy song
To carry on
To know whom you belong

She's calling all angels calling
Says they gonna take me and fly away
She's calling all angels calling
Spread their wings and help me to find my way

Chorus

What ever you feel
What ever you feel
She's waiting for the son
What ever you feel
What ever you feel
Way before the light comes
She's calling all angels not calling my name

She takes the story
Turns it to glory
She prays and sing a song

A piece of bread
We all may take
There is for every one

She's calling all angels calling
Says they gonna take me and fly away
She's calling all angels calling
Spread their wings and help me to find my way

Chorus

What ever you feel
What ever you feel
She's waiting for the son
What ever you feel
What ever you feel
Way before the light comes
She's calling all angels not calling my name

And now you're gone
way before the light comes
I touch the promised land
keep calling all angels calling your name
