

My song

You don't know how I feel
To make my music all day
To do just like I want

You don't know how I live
To make it better all day
To never let it go

You don't know how good it is
To sing my music all night
Trying to make it right

You don't know what it takes
To think about it all day
Hum it all of the time

Chorus
Every day and every night
I sing my song
I've been waiting for so long
Before it came along

Every day and every night
I sing my song
I've been waiting for so long
Before it came along

Let me hum it like I feel
To make it better all day
Don't wanna get it wrong

Let me think that I'm flying high
I just can't be more pleased
Than when my song is done

You don't know can't make it slow
Time is missing in a day
So let's get it on

You don't know how I feel
Don't care about being lonely
Just wanna sing my song

Chorus
Every days and every night
I sing my song
I was waiting for so long
Before it came alone

Every days and every night
I sing my song
I was waiting for so long
Before it came along
